

ARTECHSTONE
DISTRIBUIDORA DE PEDRAS IMPORTADAS

ARTECH|LÂMINA

Design & Alta Performance

ULTRACOMPACTO

Carrara Cinza

Artechlâmina combina estilo e praticidade com diferentes designs, desde o minimalismo de tons neutros à imponência do mármore para a criação de espaços únicos de alta performance.

Oro Italiano

Beleza atemporal em cada detalhe

ARTECHLÂMINA

Artechlâmina é uma superfície ultracompacta produzida a partir da moagem úmida de mais de vinte minerais de alta qualidade, tais como: quartzo natural, feldspato, caulino, argilas, entre outros.

Esses componentes são mesclados e devidamente homogeneizados. Logo em seguida, são distribuídos na linha de produção para a compactação a seco, onde recebem uma pressão de 23 toneladas por chapa.

Designed to stand the test of time

Na sequência, recebem a impressão em Ultra HD e sinterização a 1280°C em fornos de última geração. Para concluir o processo, as chapas recebem exigentes controles de qualidade para certificar que essa superfície tenha a robustez e a durabilidade necessáras para os mais diversos usos.

ARTECHLÂMINA

**Artechlâmina é leve,
resistente, versátil e
possui baixa porosidade.**

Artechlâmina pode ser utilizado em áreas internas e externas, em revestimentos, mobiliário e decoração. É um material perfeitamente adequado para bancadas de cozinha devido à sua alta resistência às temperaturas, abrasão e raios UV.

Precauções ao Cortar Lâminas ultracompactas

Máquina de Corte Elétrica com Trilho Guia e Ventosas (para cortes retos e chanfro em ângulo de 45°)

Mesa de Trabalho Plana

Boina Diamantada

Alicate para corte de chapas

Furadeira Elétrica e Broca Diamantada

Esmerilhadeira Angular Elétrica e Disco Diamantado

Para cortes retos, posicione as chapas sobre uma bancada plana e fixe a barra de corte, garantindo que a roda de corte esteja alinhada com a linha marcada. Inicie o corte fazendo um pequeno risco de 2 a 5 mm em uma das extremidades e, em seguida, complete o corte a partir da outra extremidade. O corte das chapas deve ser realizado de forma contínua, sem interrupções, mantendo sempre a mesma velocidade e pressão.

Desloque a chapa sobre a bancada de modo que a linha de corte fique projetada entre 10 e 15 mm para fora da borda da mesa.

Inicie a separação da peça nas duas extremidades utilizando um alicate quebrador. Em seguida, aplique pressão de forma controlada para destacar e remover a parte excedente.

Por fim, a borda deve ser devidamente polida e limpa com um rebolo resinado ou uma esponja diamantada, garantindo um acabamento uniforme.

Os furos devem ser realizados a, no mínimo, 5 cm das bordas externas da chapa.

Posicione a chapa sobre uma bancada estável, limpa e plana.

Para furos circulares, inicie marcando o local com um lápis e, em seguida, comece a perfuração utilizando uma broca diamantada.

Recomenda-se iniciar a perfuração com a ferramenta inclinada em aproximadamente 75° , variando o ângulo de forma lenta e constante, garantindo que a chapa permaneça sempre resfriada durante todo o processo.

Para o chanfro em ângulo de 45°, ajuste a máquina de corte da chapa para o modo de chanfro. O desbaste deve ser realizado lentamente, mantendo velocidade constante ao longo de toda a borda da chapa.

Após o acabamento, finalize as bordas cortantes manualmente com um polidor diamantado ou utilize um rebole diamantado com ligante de resina, escolhendo o grão mais adequado para o acabamento.

Limpeza e Manutenção das Lâminas ultracompactas

Limpeza Diária: A limpeza comum remove sujeira e marcas, restaurando a aparência da superfície.

Para chanfro em ângulo de 45°, ajuste a máquina de corte da chapa para o modo de chanfro. O desbaste deve ser realizado lentamente, com velocidade constante, ao longo de toda a borda da chapa. Após o acabamento, finalize as bordas cortantes da chapa manualmente com um polidor diamantado ou utilizando um rebolo diamantado com ligante de resina, escolhendo o grão mais adequado para o acabamento.

Líquidos manchantes, resíduos orgânicos	Produto de limpeza
Gordura, óleo, borracha, alcatrão, massas de rejunte, resíduos de silicone, corantes, nicotina, esmalte de unhas, adesivo epóxi e rejunte, resíduos de cimento, ferrugem, calcário, gesso, vinho, café, sorvete, cola, sucos de frutas, nicotina.	Detergente convencional, removedor de gordura Desengordurante, solvente, detergente alcalino, solvente, solvente à base de acetona, acetona, solvente. Removedor de gesso ácido, detergente ácido alcalino, oxidante ácido.

Recomendações:

Não esfregue as superfícies utilizando ferramentas abrasivas, como esponjas metálicas ou duras.

- Evite escovas que possam riscar a superfície ou deixar marcas indeléveis;
- Resíduos de gordura e óleo podem ser removidos utilizando detergentes à base de solventes orgânicos ou alcalinos, seguidos de enxágue cuidadoso;
- Evite o uso de sabão, pois tende a deixar uma película escorregadia, especialmente em água dura;
- Não utilize produtos que contenham cera ou agentes de brilho;
- Evite detergentes abrasivos em superfícies brilhantes e/ou polidas; eles podem ser utilizados em materiais foscos, mas teste primeiro em uma pequena área escondida;
- De maneira geral, ao usar qualquer detergente não neutro, teste antes em uma peça não instalada ou em uma pequena área escondida do piso;
- Embora as Lâminas Gold Medal sejam superfícies extremamente resistentes, evite impactos em áreas mais expostas (cantos, bordas, chanfros, etc.);
- Evite radiações diretas em temperaturas muito elevadas, como chaminés, churrasqueiras, etc.;
- Evite o contato direto com chamas;
- Evite cortes diretos na superfície com faca cerâmica;
- Para superfícies brilhantes, evite cortes diretos e o contato prolongado com objetos industriais em altas temperaturas.
